SUMMARY

I have successfully completed my BSc in Computer Science from JJ College of Arts & Science, gaining a strong foundation in computer science concepts. Additionally, I have completed a Python programming course and a Java Full Stack course at Besant Technologies, equipping me with skills in Python development and comprehensive knowledge of full-stack web development using Java technologies. These experiences have prepared me for a career in software development and programming.

PROJECTS

Shopping Cart Application

- The Watch E-commerce website project features a sleek design for showcasing various watch products. Built with HTML for structure
- CSS for responsive styling, and JavaScript for dynamic interactions, it includes product listings, filters, and a shopping cart. The site offers a seamless shopping experience with smooth navigation and functionality

Sweet Honey E-commerce Website

- The Sweet Honey e-commerce website features an intuitive interface for browsing honey products. Built with HTML, CSS, and JavaScript, it offers product displays, a shopping cart, and checkout functionality. The site combines smooth navigation with an attractive design to provide an enjoyable and seamless shopping experience.

UNAUTHORIZED TERROR ATTACK TRACKING SYSTEM USING WEB USAGE MINING

- ABSTRACT With the speedy increase in social network applications, people are using these platforms to voice their choices regarding the daily problems.
- Twitter is a tremendously popular micro blog on which users might voice their opinions. Opinion investigation of twitter data is a field that has been given a lot of attention over the last decade and involves dissecting "tweets" (comments) and the content of those expressions. Solely this project explores the assorted sentiment analysis applied to twitter data and their outcomes.
